## STEP 1

Unpack

### What do I need?

- Wooden Spoons (to help insert fluff)
- Scissors
- Buckets for fluff
- Thick Pen

You are provided with a variety of Stufferers in your pack. Every child should be handed one Stufferer to make or you may like to give them the choice.

There are 2 popular ways:

- 1) 'Pass -the-Parcel' where each layer reveals a bear.
  - 2) Put the bears into brown paper bags and hide them in the yard for the kids to find
- Every child will love whatever they get!

Stuff the legs first then the arms while kneading the stuffing into any creases or small parts with your hand or wooden spoon. Fill the head and body last. To get a softer animal it will need less stuffing than a firm animal.

It should take no more than 10-15 minutes to fill each Stufferer with fluff. All children should be supervised by an adult. We suggest you get some buckets and fill them with the fluff for each child - this is a fun experience for all.

When finished, hand out the love hearts (made from fabric) to each child and repeat the following:

*Special Cable Tie, then Velcro closure*

- Touch it on your EAR so it can hear you talk
- Touch it on your KNEES so it can run fast
- Touch it on your EYES so it can see what you see
- Touch it on your HEART so it loves you back
- Give it a KISS and put in BEAR

As they insert the fabric love heart into their Stufferer recite:

"I fill you with LOVE my cute little friend. I will love you till the very very end"

At this time if you have sounds or smells they should be inserted.

Then pull the cable tie to close it tight and lock it into position with our Velcro feature.

Ask the kids to start thinking of a name to call their new friend.

If you have ordered some of our sensational clothing or shoe packages, then the children can start to dress their Stufferer. Everyone will love their Stufferer - clothed or not.

*\*Clothes, Shoes, Smells and Sound Chips are optional accessories*

Let the kids fill in the birth certificates to complete the experience. They will need to measure the bear with a ruler or tape. If you don't have scales to weigh the bear, most bears are approx. 300 grams.

Let the kids play with their new friends. Kids have great imaginations and will have a BEARY great time.
