## STEP 1

Unpack

### What do I need?

- Wooden Spoons (to help insert fluff)
- Scissors
- Buckets for fluff
- Thick Pen

You are provided with a variety of Stufflers in your pack. Every child should be handed one Stuffler to make or you may like to give them the choice. Here's an idea - play 'Pass-the-Parcel' or let the birthday host select first and then hand out the remaining Stufflers randomly. Every child will love whatever they get!

Ask the kids to start thinking of a name to call their new friend. Then using the love insert repeat the following as they insert into their Stuffler. You should do this as a group.

"I fill you with LOVE my cute little friend. I've called you <insert name> and will love you till the very end"

Pull the drawstring and zip up. Cut the drawstring with scissors after closing to lock it into position with our zip lock feature.

If you have ordered some of our sensational clothing packages, then the children can start to dress their Stuffler. Everyone will love their Stuffler - clothed or not.

\*Clothing and Sound Chips are optional accessories

## STEP 5

Naming & Fill with LOVE Ceremony

10 mins

## STEP 2

Hand out

Stuff the legs first then the arms while kneading the stuffing into any creases or small parts with your hand or wooden spoon. Fill the head and body last. To get a softer animal it will need less stuffing than a firm animal.

It should take no more than 10-15 minutes to fill each Stuffler with fluff. All children should be supervised by an adult. We suggest that you get some buckets and fill them with the fluff for each child - this is a fun experience for all.

Hand out the love shapes so the kids can decorate their own love. Let them be creative and provide them with a selection of colours to use and perhaps even glitter!

When finished, Hand out LOVE (made from fabric) to each child and repeat the following as they insert into the Stuffler:

Press this button. Hold it and speak into speaker to record for up to 10 seconds. Twist it to lock in place.

Let the kids fill in the birth certificates to complete the experience. They will need to measure the bear with a ruler or tape. If you don't have scales to weigh the bear, most bears are approx. 300 grams.

Let the kids play with their new friends. Kids have great imaginations and will have a BEARY great time.
